

DOUBLE

YOUR OUTCOMES DATA VOLUME COMPLIANCE

WITH THIS
one SIMPLE
TRICK!

What is outcomes data volume compliance, and why does it matter?

Data compliance is the percentage of patients with completed admission and discharge assessments for the same instrument. When patients have matching assessments, change scores can be calculated. Change scores should be used by clinicians to track patient progress and by programs to monitor and communicate effectiveness in helping patients.

Do you want to increase your compliance, regardless of population or level of care?

BUT WAIT, THERE'S MORE!

Do you want **IMMEDIATE** and **SUSTAINABLE** results?

Compliance 6 Months Before and After Simple Trick

DYNAMIC FORMS IS THE MUST HAVE SIMPLE TRICK OF 2019!

Mental Health Outcomes now offers Dynamic Forms, an online platform for collecting and submitting patient outcomes data.

What's not to like?

Instant, time saving data
submission

Next day
On Demand reporting

Enhanced, instant patient
level reporting designed to
meet TJC requirements

Patient satisfaction also
available, with patient
comments
